

Gravel Boards

Jacksons Fencing

Jacksons supplies two types of standard gravel board:

The first is a gravel board for use with our slotted Jakposts®. This version includes two spacer blocks that prevent the gravel board from moving when installed in the slotted posts. The spacer blocks can be purchased separately if spares are required (667601). We recommend gravel boards are screwed into position to prevent any movement.

The second gravel board type (230700) we offer is typically used with Traditional Fencing, such as Traditional Featherboard. This version will not work with our slotted Jakpost® system.

When using two gravel boards to increase the height of a fence, the boards should be held together with a 600mm x 50mm x 50mm (644400) support post to prevent any distortion. This should be placed centrally and driven into the ground with the gravel boards screwed to it. Gravel boards are not intended to retain earth on one side of the fence without additional support.

Gravel Board for use with Slotted Posts

This gravel board is 1.83m long, 140mm x 28mm. It includes 2 x 145mm x 47mm x 22mm packer blocks. Jakcure® treated with a 25 year Jakcure guarantee. Used mainly with our standard garden fence panels when using slotted fence posts (Jakposts®).

- All timber used throughout is superior quality Jakcure® treated softwood guaranteed for 25 years.
- Used when fencing/panels are in contact with the ground as part of the 25 year Jakcure® guarantee conditions.
- Gives extra height to a fence.

Specification - for Slotted Posts

Gravel Board Height: 140mm
Width: 1830mm
Depth: 28mm
Packers: 22mm
Stock code: 667600

Gravel Board for use with Traditional Featherboard

This gravel board is 2.4m long, 150mm x 25mm. Jakcure treated with a 25 year Jakcure® guarantee. Used mainly with Traditional Featherboard fencing. Gravel board is nailed to posts, usually using 3 no. x 75mm nails each end.

Specification - for use with Traditional Featherboard

Gravel Board Height: 150mm
Width: 2400mm
Depth: 25mm
Packers: 22mm
Stock code: 230700

Where possible, avoid cutting, drilling or notching any timber that will be in-ground, as per our 25 year Jakcure® terms and conditions. If occasional sections have to be cut or you need to reduce the width of the gravel board on site, then Cut Treatment should be applied liberally.

A fully made to measure service is available. All Jacksons Fencing systems and gates may be designed and manufactured to suit site conditions.

Hedgehog Friendly Gravel Board

Introduced in 2015, the Hedgehog Friendly Gravel Board was designed in response to the decline in hedgehog numbers in the UK. For use with our slotted Jakposts® with a hole at one end, it is large enough to allow hedgehogs free passage and has a reinforcing strip along the top of the board to ensure strength is retained.

- All timber used throughout is superior quality Jakcure® treated softwood guaranteed for 25 years.
- All fixings are stainless steel.
- Designed for use with slotted Jakposts®.
- Reinforcing strip along the top of the board to ensure strength.
- Used when panels are in contact with the ground as part of the 25 year Jakcure® guarantee conditions.
- Gives extra height to a fence.
- Helps to save hedgehogs.

Specification

Gravel Board Height: 140mm
 Width: 1830m
 Depth: 28mm
 Packers: 22mm
 Stock code: 667610

Hole dimensions

Height: 96mm
 Width: 160mm

If you need to reduce the width of the Hedgehog Friendly Gravel Board on site, always use Cut Treatment on any cut timber.

Hedgehog Friendly Gravel Board for Non-Panel Form Panels

For a hedgehog friendly version of the Traditional Fencing (non-panel) gravel board, we suggest customers cut the gravel board on site and use a small peg to support the fence rail. The support pegs are also used to prevent gravel boards from distorting when more than one is used to increase height.

Support Peg

600mm x 50mm x 50mm
 Stock code: 644400
